

WreathMaster Clamp Machine (Patented)

The **WreathMaster** eliminates the need for hammering clamps from the top after you have closed them. It reduces the time needed for manufacturing wreaths and results in a very tight finished product. Put up to **20% more** greens in a standard clamp ring. (**especially useful** when wreaths are made earlier (shrinkage) or for large rings that need a wider face).

THE WREATHMASTER

- **UNIQUE DOUBLE-ACTION** compresses greens from the top and side in **one single foot pedal stroke**, resulting in more greens per clip and the **fullest and tightest finished wreaths.**
- **ONLY MACHINE** with an **offset foot pedal** which **reduces stress** to your lower back and legs.

WreathMaster in action.

Try pulling the greens out of a wreath made on a WreathMaster and see the difference.
